

# Numina:Construct Press Kit

## SCOUTSPARK

A solo game developer. Software engineer Based in México. Love for coding, art and Videogames 💖

## Game Pitch

Numina:Construct is an exciting 3D shoot 'em up with fast-paced action and intense bullet streams that will test your reflexes. With exciting camera changes, beautifully designed environments, and thrilling boss battles, every level feels like an adventure. Use polarity shields for defense and strike back fiercely, Customize your ship and select from a diverse arsenal to face waves of enemies in battles where every decision counts.

## Mechanics

- **Move and Dodge:** Maneuvers allow you to evade enemy fire in critical moments. Additionally, use "**Precision Movement**" to navigate tricky situations with a closer camera view.
- **Attack and Destroy:** Explore a diverse arsenal of weapons and adapt your playstyle to the situation. Each weapon offers unique abilities, allowing you to personalize your approach in every battle.
- **Defend:** Face your enemies intelligently using polarity shields. These shields allow you to block projectiles of the same color.
- **Master Every Angle:** As the action intensifies, dynamic camera angles immerse you in the battle, automatically switching between vertical, horizontal, and third-person perspectives.
- **Customization:** Add a personal touch to your ship by choosing from a wide selection of aesthetic designs and customizable colors.

## Features

- **Choose Your Difficulty.**
- **Score Challenge.**
- **Destroy Bosses**
